

What AI companies actually charge for?

- Agentic AI for 8 year $\Rightarrow$ BLP Digital

$\hookrightarrow$ Focus on infrastructure // application layer

$\hookrightarrow$ AI in real processes / application layer

$\hookrightarrow$ BLP Agents :

- companies run on processes
- process as guidance & control
- Admin (back office) for processes
- ERP process automation

Business as customer!

- Person who owns process

- Pricing + evolution?

$\hookrightarrow$ projects

$\hookrightarrow$ consumption based horrible! Business has budgets

$\hookrightarrow$ Bundle in documents (invoice, etc.) $\Rightarrow$ processed documents

↳ complexity based pricing

- run on their system for 1 week
- understand complexity
- License price incl. set-up, etc.

→ 3y min. periods with yearly fee!

- Predictable → ~~PO~~ volume to be monitored

→ KPI?

↳ switch to processing invoices with B2P

↳ Not adoption but more

↳ Automation

+ Increase productivity ⇒ Realize value!

1.300 projects → team assessing data points, monitoring real API / Token usage!

Free trials → shift value to the left (sales) → get it tangible, trust, invest into trust!

- Force customers into trying technology out
- 90% success rate after trial!
- condition : Meeting after trial!

Perceived pricing } - 50.000 daily active usage
 - No seat reduction but reduce time of people have to spend in the tool!

- Shitty data $\Rightarrow$ Human mistakes in data constantly correct error
 Agents can't decide based on flawed data $\Rightarrow$ give it to a human to decide
 $\rightarrow$ No user pricing!

- Advise : Time to value
 $\rightarrow$ Adoption fails $\begin{cases} \text{tech} \\ \text{people} \end{cases}$
 $\hookrightarrow$ customers need help with communication & change mgmt

→ communicate change well !

→ Good COWs = I do not know
but compet. does it,
boss wants it, lets
jointly try & stay ahead
